Volkswagen at a Glance

The Volkswagen Group with its headquarters in Wolfsburg is one of the world’s leading automobile manufacturers and the largest carmaker in Europe. Around the world, nearly 400,000 employees produce about 30,000 vehicles or are involved in vehicle-related services each working day. The Volkswagen Group sells its vehicles in more than 150 countries.

In 2010, the Group increased the number of vehicles delivered to customers to 7.2 million (2009: 6.3 million), corresponding to a share of 11.4 percent of the world passenger car market.

Note: 2010 figures
The Volkswagen Group consists of two divisions: the Automotive Division and the Financial Services Division.

The activities of the Automotive Division are centred on the development of vehicles and engines, the production and sale of passenger cars, commercial vehicles, trucks and buses, and the genuine parts business.

The Financial Services Division’s portfolio of services combines dealer and customer financing, leasing, banking and insurance activities, and fleet management.

### Group Structure – Two Strong Divisions

The Volkswagen Group consists of two divisions: the Automotive Division and the Financial Services Division.

The activities of the Automotive Division are centred on the development of vehicles and engines, the production and sale of passenger cars, commercial vehicles, trucks and buses, and the genuine parts business.

The Financial Services Division’s portfolio of services combines dealer and customer financing, leasing, banking and insurance activities, and fleet management.

## Our Brands and Products – A Success Story

Volkswagen is the most successful multibrand group in the automotive industry.

The Group consists of nine brands from seven European countries: Volkswagen Passenger Cars, Audi, Škoda, SEAT, Bentley, Volkswagen Commercial Vehicles, Scania, Bugatti and Lamborghini. Each brand has its own character and operates as an independent entity in the market to better satisfy the specific needs of the different segments and countries.

In addition, Volkswagen holds a 49.9% stake in Porsche Zwischenholding GmbH. Volkswagen is working towards an integrated automotive group with Porsche.

Our brands offer mobility in every vehicle class to meet the highest expectations, all around the globe. Diversity is our great strength and an important driving force.

1 49.9% stake in Porsche Zwischenholding GmbH since 7 December 2009
Our Huge Product Range Satisfies all Major Customer Groups

With one of the broadest product and segment coverage of any OEM\(^2\), Volkswagen is well positioned to capture profitable growth.

The product range extends from low-consumption small cars to luxury class vehicles. In the commercial vehicle sector, the product offering spans pick-ups, buses and heavy trucks.

This huge portfolio enables us to reach all major target customer groups.

1. Product to be launched in 2011
1. ‘Innovative’, ‘providing enduring value’ and ‘responsible’ are the three key messages of the Volkswagen Passenger Cars brand combined in the slogan “Das Auto.”

2. The core brand of the Volkswagen Group which became globally popular with the Beetle conveys quality, reliability and German engineering skills worldwide.

3. In 2010, the Volkswagen Passenger Cars brand updated its outstanding range by launching a new generation of numerous models, including the Passat and the Touran. In addition, vehicles designed for specific markets were presented like the Tiguan Long Wheel Base for the Chinese market or the Jetta for the US market.

In its mission to become the market leader in the premium segment, in 2010 Audi showcased a series of new models such as the new Audi A7. Furthermore, Audi presented the new Audi A1 to capture the premium small car market.
“Simply clever” – this is the slogan under which Škoda has grown into one of the fastest emerging brands, particularly in Europe and China. The Škoda brand embodies a combination of intelligent concepts for the use of space plus attractive designs and compelling value for money. Since the company’s entry into the Volkswagen Group in 1991, the Czech company has tripled its production, substantially broadened the product portfolio and strengthened the image of the Škoda brand. Presently, the brand employs more than 24,700 people. Škoda Auto has production facilities in the Czech Republic and India. Furthermore, Škoda cars are produced in China, Russia, the Slovak Republic, the Ukraine and Kazakhstan.
The SEAT brand has chosen the pithy core values sporty, young and design-oriented that represent the slogan "auto emoción."

As the only Spanish automaker, SEAT aims to fuse Spanish passion and German technology in cars. The innovative and cutting-edge spirit of the brand can be seen in its model range which with the sole exception of the Alhambra is wholly manufactured at the Martorell production plant in Spain. Internationally successful, SEAT already exports 2/3 of its production globally.

In 2010, the SEAT brand not only celebrated its 60th anniversary, but also regained the market leadership in the Spanish market.
To build a good car, a fast car, the best in class – this was the mission of W.O. Bentley when he founded Bentley Motors in 1919. Still today, the definitive British luxury car company dedicates itself to developing and crafting the world’s most desirable high performance cars with the stamina to cross continents at pace, and drive in refined comfort and style. Located in Crewe, England and belonging to the Volkswagen Group since 1998, Bentley employs more than 4,000 people.

In 2010, Bentley responded to the challenging environment in the luxury segment with models like the new Mulsanne that fulfill the highest demands of design, quality and technical excellence.

**33.5% INCREASE IN PRODUCTION IN 2010**

With its diverse portfolio of light commercial vehicles, Volkswagen Commercial Vehicles offers superior transport and mobility solutions at the highest technical level. The current product range is tailored to meet the individual needs of retailers, as well as families. Volkswagen Commercial Vehicles stands for quality, durability and competitive whole life costs thanks to strong residual values. The brand counts with a unique network of more than 16,500 employees working in three plants in Hanover, Poznan and Pacheco.

The brand recorded a successful year 2010 entering the pickup segment with the new Amarok and celebrating the 25th anniversary of the Multivan.
At Scania, the core values of “customer first”, “respect for the individual” and “quality” take precedence. Guided by these core values, the over 100-year-old Swedish company from Södertälje delivers optimised high-performance trucks, busses and engines. A growing proportion of the company’s operations consists of products and services in the financial and service sectors. Production takes place in Europe and South America, with facilities for global interchange of both components and complete vehicles.

In 2010, Scania increased its sales figures significantly. The brand further advanced the “Ecolution by Scania” program.

Lamborghini & Bugatti

**LAMBORGHINI**

Lamborghini stands for extreme and uncompromising supersportscars of the best Italian tradition.

In 2010, Lamborghini redefined the future of its supersportscars and decided to focus more on weight reduction than on top-speed. Extensive use of carbon fibre, even at a structural level, allows Lamborghini to be at the forefront of development techniques.

Lamborghini with its headquarter in Sant’Agata Bolognese is represented in 45 countries employing 990 people.

**GALLARDO**

**BUGATTI**

Bugatti has always been the epitome of exclusivity, luxury, elegance, style, extraordinary design, and a great passion for automobiles.

Unique visions, the strong legacy of legendary sports cars that date back to the year 1901, and high-precision engineering in development, construction, and manufacture distinguish this outstanding automotive brand.

Today the two models, the Veyron 16.4 and Veyron Grand Sport are manufactured in Molsheim, France where Bugatti employs 65 people.

**VEYRON**
“Financial services products are an integral part of mobility packages and contribute to our long-term brand and customer loyalty”, emphasizes Hans Dieter Pötsch, CFO of the Volkswagen Group. The Volkswagen Financial Division supports the sales of all Volkswagen Group brands throughout the world and increase customer loyalty in a sustainable manner along the entire automotive value-added-chain.

By offering innovative products, the Financial Services Division ensures peace-of-mind mobility for a growing number of customers around the world. The Financial Services Division is divided into two parts: Volkswagen Financial Services and Scania Financial Services.

The global financial services activities of the Volkswagen Group, with the exception of the Scania brand, are coordinated by Volkswagen Financial Services AG.

In 2010, Volkswagen Financial Services once again made a significant contribution to the Volkswagen Group’s earnings and sales situation continuing the systematic internationalization of its business activities.
Volkswagen Financial Services is the largest automotive financial services provider in Europe presently employing more than 7,700 employees worldwide, of which 4,300 work in Germany.

Directly, as well as through equity participations and service contracts, Volkswagen Financial Services offers financial services for more than 60 years together with the Volkswagen Group brands in 37 countries worldwide.

Volkswagen Financial Services’ portfolio includes dealer and customer financing, leasing, banking and insurance activities, as well as fleet management.

Overview – World Car Markets and Volkswagen Group Deliveries to Customers

With its nine brands, the Volkswagen Group has a presence in all important automotive markets around the world.

It is the goal of the Group to offer attractive, safe and environmentally sound vehicles which are competitive and which set world standards in their respective classes.

Currently, the key markets include Western Europe, China, Brazil, the US, Russia and Mexico. Volkswagen was able to further extend its good competitive position in spite of the challenges of the automotive year 2010 and significantly increased the Group’s market share in important key markets.

The biggest growth potential for the Volkswagen Group is expected in the markets of China, Brazil, India, Russia, the US and the ASEAN region.
In Western Europe, our deliveries to customers in 2010 were similar to the previous year's level, in spite of the sharp decline in Germany’s passenger car market after the end of the German scrappage program. Excluding the German market, all of the volume brands increased sales to customers in comparison to the previous year. Demand was particularly buoyant for the Polo, Tiguan and SEAT Leon models. The new Audi A4 allroad quattro, Audi A5 Sportback, Škoda Yeti, Škoda Superb Combi and SEAT Exeo ST models also experienced strong demand. Volkswagen maintains 28 plants in Western Europe, 13 of which are situated in Germany.
In Central and Eastern Europe, our deliveries experienced a significant increase. This performance was primarily driven by the very positive development of the Russian passenger car market in the second half of the year which followed from economic stabilisation and government incentives.

In Central and Eastern Europe, there was rising demand in particular for the Polo, Golf, Tiguan, Audi A6, Audi Q5, Škoda Octavia and SEAT Leon models. The new Audi A5 Sportback and Škoda Yeti models were likewise very popular with customers in this region.

Volkswagen maintains twelve plants in Central and Eastern Europe, one of which is located in Russia.

### 20.9%

**Increase in Deliveries in the US in 2010**

Although growth in the passenger car market in the USA slowed somewhat in the second half of 2010, the Volkswagen Group’s sales figures were not affected and rose considerably. The New Beetle, Golf, Tiguan, Passat CC, Audi A3, Audi A6, Audi A5 Coupé and Audi Q5 models recorded the highest growth rates in the US.

As a core element of our strategy for the North American region Volkswagen set up its new plant in Chattanooga (US) where the production of the Volkswagen Passat will begin in 2011 with a high level of localization.

Apart from the US plant, Volkswagen maintains a plant in Puebla, Mexico. In Mexico the models with the sharpest increases in demand included the Tiguan, Jetta, Audi A4 and SEAT Ibiza.

21.9%

MARKET SHARE IN BRAZIL IN 2010

Demand in the South American passenger car markets increased compared with the previous year. The Volkswagen Group delivered around 10 percent more vehicles to customers. In Brazil, sales figures were up thanks in particular to strong demand for the Fox and Saveiro models. The Volkswagen Group is the second largest light vehicles manufacturer in Brazil.

Volkswagen maintains eight plants in South America, five of which are located in Brazil and three which are situated in Argentina where Volkswagen maintained its leading position.

In terms of passenger car sales, Asia-Pacific was by far the fastest-growing region in 2010. The Chinese passenger car market continued its dynamic growth, but at a slightly slower pace. However, Volkswagen again defended its leadership position.

Demand was particularly high for the Polo, Golf and Audi A3 models. The performance of our deliveries to customers also remained positive in the other markets in the Asia-Pacific region. In India, our sales figures were more than double the previous year’s level.

Volkswagen maintains eleven plants in Asia Pacific, nine of which are situated in China.
The importance of the Chinese market has significantly increased in the past years. As the automotive pioneer, Volkswagen entered the modern Chinese market in 1984 founding a joint venture with the Shanghai Automotive Industrial Corporation (Shanghai Volkswagen Automotive Co.). A second joint venture, FAW-Volkswagen Automotive Co, Ltd. was set up in 1990 to expand the Group’s activities. Today Volkswagen is represented by 16 companies producing at nine facilities – both vehicle production plants and component plants.

The product range of the brands Volkswagen Passenger Cars, Audi and Škoda is supplemented by vehicles that are produced especially for the Chinese market such as the Passat New Lingyu, the Lavida and the New Bora. Furthermore, the VW Group also offers its luxury brands Lamborghini and Bentley in the Chinese market.

Key Financial Figures 2010 – Record Profits and Highest Deliveries Ever

In 2010, the Group’s unit sales, market share, image ratings, earnings and financial strength all improved. This is further impressive proof of our Group’s robustness and competitiveness. We significantly increased our profitability, which shows that our decision to continue our policy of disciplined cost and investment management was the right one.

Hans Dieter Pötsch
Finance and Controlling

- Deliveries topped the 7 million mark for the first time at 7.2 million vehicles (+13.7 percent); market share increased further
- Operating profit was up significantly on the prior-year level at €7.1 billion (€1.9 billion)
- Volkswagen Group generated a record profit in fiscal year 2010 (net profit €7.2 billion)
- The Board of Management and Supervisory Board proposed to pay a dividend of €2.20 per ordinary share and €2.26 per preferred share
- The Automotive Division’s net liquidity rose against last year’s high figure to €18.6 billion (€10.6 billion)
- Continued business expansion and the implemented capital increase strengthened the Group’s financial stability and flexibility in the context of the planned creation of an integrated automotive group with Porsche

Sustained Commitment to Profitable Growth

The Volkswagen Group significantly increased its sales revenue and operating profit in 2010. Against the background of the planned creation of an integrated automotive group with Porsche, the capital increase strengthened the Group’s financial stability and flexibility.

In 2010, the Volkswagen Group generated sales revenue of €126.9 billion (+20.6%) and a record profit. Profit before tax was close to €9 billion.

At €7.2 billion, the Volkswagen Group’s net profit exceeded the prior year figures by €6.3 billion.

\(^1\) As of December 31, 2010
Robust Financial Structure

It is part of Volkswagens strategy to ensure a solid, stable financial position at all times. We are therefore able to finance our own growth. We aim to safeguard an adequate liquidity, a healthy financing structure and our rating, which compares extremely well with the rest of the sector.

2010 saw a significant improvement in the Volkswagen Automotive division’s net liquidity in comparison to 2009. In addition to operating activities, the successful capital increase in the first half of 2010 made a key contribution to this. As a result, the Automotive Division’s refinancing requirements from money and capital market bonds were substantially reduced as against the previous year.

The cash holdings, short- and long-term credit lines, and the available money and capital market programs continue to offer the Volkswagen Group a very high degree of financial flexibility, thereby enabling it to cover its refinancing requirements and ensuring that it remains solvent at all times.

This has also been recognized by the rating agencies, which confirmed Volkswagen’s very good rating by sector standards.
Deliveries, Sales Revenue and Profits Expected to Increase Further

**OUTLOOK 2011**

- Deliveries to customers are expected to increase versus 2010 thanks in part to our unique brand portfolio and growing presence in all key regions of the world.
- Sales revenue is expected to be higher than the prior year.
- Modular toolkit system will have an increasingly positive effect on the Group’s cost structure.
- Continuing volatility in interest and exchange rate trends and commodities prices will weaken the positive volume effect.
- Operating profit in 2011 is expected to be higher than in 2010.

Strategy 2018: Sustainable Profitable Growth

We have defined four goals that are designed to support Volkswagen becoming the most successful and fascinating automaker by 2018. To achieve these targets we have identified six areas to focus on:

1. Growth market focus
   - Increased market penetration
   - Emerging markets expansion
   - Balanced global footprint

2. Modular toolkit strategy
   - Reduction in investment, development and unit costs
   - Scale and efficiency effects
   - Increased production flexibility
   - Reduced time to market

3. Capital discipline
   - > 16% RoI target in automotive business
   - 20% RoE\(^1\) goal in Financial Services
   - Around 6% automotive capex in PPE/sales

4. Operating profit measures
   - Strong cost control
   - Process/product optimization
   - Regional scale effects

5. Synergy potential
   - Leveraging best practices across the Group
   - Purchasing, production, and distribution benefits

6. Potential upside
   - Product portfolio extension
   - North American expansion and market recovery
   - Commercial vehicle strategy and market recovery
   - Financial Services: strengthen the automotive value chain

\(^1\) Pre-tax
\(^2\) Including China

Note: All stated Volkswagen Group figures represent financial targets for 2018
Substantial Growth Opportunities Stemming from BRIC Countries together with a Rebound in the US Market

In 2010, we delivered 7.2 million vehicles to our customers. The BRIC markets (Brazil, Russia, India and China) as well as the US offer significant growth potential.

To meet regional customer demand and purchasing power and to minimize currency risk a clear focus on local production is necessary.

That’s why we are investing in our existing capacity, such as in Brazil, and have opened new plants in Russia, India, China. In the US we will open our Chattanooga plant in 2011.

FORECAST – MARKET GROWTH 2010 – 2018 (million units)

1 Includes Central America and Caribbean
2 Includes Turkey
Source: IHS Global Insight (data status: 07/02/11), rounded
Note: Market = Cars and LCVs
The operating profit after tax of the Automotive Division was €5.9 billion in 2010. The key reasons for the significant year-on-year improvement include volume increases, country and model mix improvements, product cost optimization measures as well as positive exchange rate effects.

Invested capital declined slightly. As the cost of capital has also fallen, the cost of invested capital was €0.3 billion lower year-on-year at €2.7 billion. The increase in operating profit after tax resulted in a clear positive value contribution of €3.1 billion.

The return on investment is the return on invested capital for a particular period based on the operating profit after tax. For the reasons already mentioned, this improved significantly year-on-year to 13.5%.

Note: Including proportionate inclusion of the Chinese joint ventures (including the respective sales and component companies) and allocation of consolidation adjustments between the Automotive and Financial Services divisions.

1 Adjusted. The return on investment after tax (RoI) is unchanged as against the previous year.
We Are Well Positioned to Reach Our Strategic Goal of Achieving Sustainable Profitable Growth

Medium-term Group targets

- Group no. of units sold: 8.0 million (incl. Scania)
- Automotive EBIT margin: 5%+
- Automotive capex/sales: c.6%
- Financial Services pre-tax RoE: 15%¹
- Financial Services cost-income ratio: c.55%
- Credit rating: Maintain A

Medium-term China targets

- China no. of units sold: 2.0 million+
- Automotive EBIT margin: 6%+
- China RoI: 20%+
- Investments: €10.6 billion²

Status as of February 2010
Note: Porsche AG not reflected
¹ Normalized RoE based on 8% equity ratio
² Represents total investment of Joint Ventures 2011-2015, new investments announced in November 2010
The Volkswagen Group is Well on the Way to Becoming the Leading Automotive Group Globally

Today

All building blocks in place

• Strong brand portfolio
• Platform leverage
• Advanced technology
• Position of financial strength
• Excellent multi-brand management model

Strategy 2018

The global automotive leader

• Very well positioned to capture market share globally
• Localized value chains
• Leverage of modular toolkits
• Benefit from innovative technologies
• Higher profitability

• Extensive brand and product portfolio
• Global footprint with BRIC focus
• Unrivalled distribution
• Best-in-class manufacturing
• Technology and quality leader, incl. e-mobility

Strong foundation

Capitalize on strategy implementation

Global economic and environmental leadership

Body

Modularisation enables standardisation with visible customisation whilst maintaining the individual brand identity.

In the early 1990’s Volkswagen introduced the platform strategy, which allowed different models of the same size to share a common platform. Over the years this strategy was further developed and leads to today's modular toolkit strategy. Independent from size and segment, several parts, such as engines, gearboxes or air conditioning, can be used for different vehicles. This ensures that the synergy effects that exist, both between models in one series and across all series and brands, can be optimized and increased. Through the modularization of the body, vehicles can be produced in different stages for the length, width and wheelbase – an approach that benefits the manufacturing process.

1 49.9% stake in Porsche Zwischenholding GmbH since 7 December 2009
Modular Toolkit – Preparing for Modular Transverse Matrix

MODULAR LONGITUDINAL MATRIX (MLB)

The Modular Longitudinal Matrix is the use of a modular strategy in vehicle platforms in which the drive train is mounted longitudinally to the direction of travel. This modular arrangement of all components enables maximum synergies to be achieved between the vehicle families. This concept is already used at Audi since 2007 to develop vehicles.

MODULAR TRANSVERSE MATRIX (MQB)

The Modular Transverse Matrix signifies the next quantum leap in the extension of the cross-brand platform and modular strategy. As an extension of the modular strategy, this toolkit can be deployed in vehicles whose architecture permits a transverse arrangement of the engine components. The MQB enables us to meet customers’ expectations for a growing variety of vehicle models, equipment features and design, reducing the complexity, costs incurred and time required for development at the same time. From 2012, the Volkswagen Passenger Cars, Volkswagen Commercial Vehicles, Audi, SEAT and Škoda brands will develop a wealth of models based on the MQB toolkit, all of which will feature innovations in the field of infotainment and driver assistance.

The “Volkswagen Way” – Continuous Productivity Improvement

The process optimization program in production is an important component of the “Volkswagen Way” and is helping to continuously improve our productivity.

EXAMPLE EOS

Lower ramp-up costs and production time will be achieved via process friendly development, process standardization, workshops, flex-line production and an optimized purchasing process.

R&D Mission

Shaping the future is a fascinating challenge for industry and society. Volkswagen’s automotive future is formed by social conditions and trends. It is the Group’s task to anticipate the future needs of our customers and to convert these needs into innovative technologies.

The technological challenges of the future can only be mastered by intensive research and networked co-operation both inside and outside the company. Our mission is to continue meeting our customers’ wishes for individual and affordable mobility through sustainable technologies. We work together with our partners to achieve this goal. Research and development activities in the Volkswagen Group in 2010 concentrated on two areas: expanding our product portfolio and improving the functionality, quality, safety and environmental compatibility of our Group products.

Example: From Beetle to XL1 - R&D achieved significant reduction in fuel consumption

1972 BEETLE 1303
Consumed 13l/100km

2011XL1 Concept Car
Consumes just 0.9l/100km
Volkswagen Continues to Invest in its Global R&D Activities

An extremely dedicated, outstanding team of more than 27,400 people develops and manufactures innovative and emotional products and captivate customers all around the world. In 2010, our employees filed 1,969 patent applications, 1,250 of them in Germany and 719 abroad.

Proven Innovation Track Record

The Group’s successful TDI, TSI, TFSI and EcoFuel engines form part of the Group’s powertrain and fuel strategy which aims at offering eco-friendly and efficient technologies that reduce local emissions and promote energy security providing an excellent starting point for the continuing electrification of the Group’s vehicle fleet.

The Multi Media Interface (MMI) is the point of control for all infotainment components – entertainment, communication, information and control of vehicle systems – elegantly combined in one display and operating system which permits a fast and user-friendly use of a large number of functions and technologies.

DSG enables better performance and lower fuel consumption. Two clutches ensure shift times in the millisecond range. Fast, sporty DSG shifting guarantees maximum driving fun.

The Park Assist is a parking steering system which enables automatic parking. The intuitively operated system includes a park pilot, distance warning front and back as well as a hill climbing assistant.

The Audi A8 Space Frame is a high-strength aluminium frame structure which integrates all panels performing a load-bearing function providing higher rigidity, greater safety, additional design freedom, improved handling, lower fuel consumption and ease of repair for the driver.

Automatic distance regulation (ACC) relieves the driver of the burden of active braking and acceleration. ACC significantly improves driving comfort and passive safety. At the same time the system (when activated) ensures adherence to the legally prescribed minimum distance from the vehicle in front.
A Technology Portfolio for Eco-friendly Mobility

Integrating a wide range of innovations into fuel-efficient, low emission mobility solutions, Volkswagen’s “green labels” offer technologies and products that are geared to significantly reduced fuel consumption and CO₂ emissions in accordance with EU and global emission regulations. Implementing our forward-looking power train strategy has enabled us to reduce our fleet’s average CO₂ emissions by 22 g/km in the past five years, i.e. by around 15%.

Steps in Electrification

Volkswagen is electrifying drivetrains step by step and is on the way to launch the first series e-vehicle for everyone, the Up! blue-e-motion. Volkswagen’s aim is not to be the fastest, but the best and safest for our customers.

- **Internal combustion engine (ICE)**
  - 1,2 l 77 kW TSI©
  - Gasoline or Diesel Engine

**Mild Hybrid**
- **Start-Stop system recuperation**
  - Combination of ICE and electric motor. The electric motor serves to boost power during acceleration. Pure electric driving is not possible.

**Full Hybrid**
- **Touareg Hybrid®**
  - Full Hybrids, in contrast to mild hybrids, can drive short distances in full electric mode.

**Plug-In Hybrid**
- **Golf twinDRIVE®**
  - The Batteries of Plug-In Hybrids can be charged by plugging into an electric socket. Due to the greater battery capacity, longer electric driving ranges are possible.

**Range Extender**
- **Electrical Vehicle**
  - Small internal combustion engine which recharges the vehicle’s battery and thereby increases its range.

**Electric vehicle**
- **Up! blue-e-motion**

**Fuel Cell**
- **Tiguan Hymotion®**
  - In the next decades, today’s technologies will continue to be dominant. Combustion engines – some of them supported by E-motors, pure E-drives and fuel cells – will co-exist side-by-side. On its path towards the future, Volkswagen will continue to research and further develop all potential engine types and introduce them as soon as it makes sense and is technically feasible.

**The Batteries of Plug-In Hybrids can be charged by plugging into an electric socket. Due to the greater battery capacity, longer electric driving ranges are possible.**

OPERATING RETURN ON SALES REVENUE IN SHORT 2010

Porsche AG is an iconic sports and luxury car brand with leading profitability. High performance meets outstanding everyday practicality, breathtaking dynamics, exceptional occupant comfort and safety. Porsche vehicles are not only remarkable – they are also designed to last: Thanks to a tirelessly dedication to quality, more than 70% of all Porsche cars ever built are still on the road today.

Porsche AG is a 100% subsidiary of Porsche Zwischenholding GmbH. Since December 2009 Volkswagen AG owns 49.9% of Porsche Zwischenholding GmbH with Porsche SE owning the remaining 50.1%.
Integration of Porsche AG Enhances Premium Brand Offering and is Expected to Deliver Substantial Synergies

Cost efficiencies

- Purchasing
- Technology sharing and joint R&D
- Common components/platforms
- Sales and distribution
- Administration
- Financial Services

Significant synergy potential

- Approximately €700 million p.a. long-term operating profit improvement targeted from formation of Integrated Automotive Group
- Over half of cost savings targeted in the medium term
- Smooth integration and ramp-up phase
- Use of Volkswagen’s distribution network for Porsche

Growth opportunities

- Targeted volume increase to ~ 150 k units mid-term and 200 k units long-term
- Extension of Porsche model line-up
- Development of high-end modular toolkit for luxury brands
- Use of Porsche’s distribution network for Volkswagen Group luxury brands
Volkswagen Purchased the Trading Activities of Porsche Holding Salzburg on March 1, 2011

KEY DATA 2010

- €12.8 billion revenue\(^1\)
- 432,000 new cars, 133,000 used: Total 565,000
- 20,859 employees

STRATEGIC INTEGRATION

- Unique opportunity to become owner of highly profitable automotive trading company and the largest dealer and trading network in Europe
- Strong presence and rich experience in the key growth markets of Eastern Europe, from which the entire Volkswagen Group will benefit
- Significant import of vehicles into China
- Porsche Holding Salzburg provides a wealth of customer relationships and information

2010 was a consistently positive fiscal year for Volkswagen AG shareholders. Volkswagen AG successfully completed its capital increase on April 16, 2010, generating net proceeds of €4.1 billion. The capital increase is a key step in the planned creation of an integrated automotive group with Porsche.

The net issue proceeds improved the Volkswagen Group’s capitalization, strengthened its financial stability and bolstered its rating. Both ordinary and preferred shares of Volkswagen AG performed positively in the past fiscal year.

Over the last years, Volkswagen showed a successful performance. Due to a sustainable dividend development of both ordinary and preferred shares, shareholders were able to participate in Volkswagen’s success.
Volkswagen Share – Key Facts & Figures

In 1961, Volkswagen first issued ordinary shares on the Frankfurt stock exchange with a nominal value of DM100 issued at a price of 350 percent. Two stock splits were performed in the course of time. Presently, the majority of the ordinary shares are held by the Group’s three biggest shareholders guaranteeing a stable shareholder structure. In 1986, Volkswagen introduced its preferred shares as an alternative investment vehicle. In December 2009 the ordinary shares were replaced through the preferred shares in the DAX stock index.

Today, Volkswagen is globally represented with a market capitalization of around €51.9 billion as of December 31, 2010. The shares are listed on different exchanges worldwide, among others in Frankfurt, London and Zurich. In the U.S., Volkswagen has 2 sponsored ADR programs, representing the preference and ordinary shares. Both are sponsored by J.P. Morgan and trade in the US on the over-the-counter (OTC) market.

<tr>
<th>Preferred shares¹</th>
<th>Unlike ordinary shares, preferred shares do not carry voting rights. Dividends are paid to stockholders in proportion to their share of the capital stock eligible for dividend in such a manner that the preferred shares shall be eligible for a dividend which is higher than that for the ordinary shares by 6 Cents per preferred share.</th>

<tr>
<th>American Depository Receipt (ADR)</th>
<th>An ADR is a U.S. dollar denominated form of equity ownership in a non-U.S. company. It represents the foreign shares of the company held on deposit by a custodian bank in the company’s home country and carries the corporate and economic rights of the foreign shares, subject to the terms specified on the ADR certificate.</th>

Disclaimer

This presentation contains forward-looking statements and information on the business development of the Volkswagen Group. These statements may be spoken or written and can be recognized by terms such as “expects”, “anticipates”, “intends”, “plans”, “believes”, “seeks”, “estimates”, “will” or words with similar meaning.

These statements are based on assumptions relating to the development of the economies of individual countries, and in particular of the automotive industry, which we have made on the basis of the information available to us and which we consider to be realistic at the time of going to press. The estimates given involve a degree of risk, and the actual developments may differ from those forecast.

Consequently, any unexpected fall in demand or economic stagnation in our key sales markets, such as in Western Europe (and especially Germany) or in the USA, Brazil or China, will have a corresponding impact on the development of our business. The same applies in the event of a significant shift in current exchange rates relative to the US dollar, sterling, yen, Brazilian real, Chinese renminbi and Czech koruna. If any of these or other risks occur, or if the assumptions underlying any of these statements prove incorrect, the actual results may significantly differ from those expressed or implied by such statements.

We do not update forward-looking statements retrospectively. Such statements are valid on the date of publication and can be superceded.
